

## POST-PROCEDURAL CARE INSTRUCTIONS

### YOUR PROCEDURE

The treatment you have selected is Venus Versa™ (MP)<sup>2</sup>.

### POST-PROCEDURAL CARE - DAY 1 TO 7

The healing time for any given treatment varies between different clients. The following represents the general recovery phases you might expect. Individual clients may experience variations from this course.

#### Swelling/Discomfort/Redness:

Swelling of your wrinkles occurs immediately. While it is possible for patients to experience swelling in the under-eye area for the first day, this swelling will subside. For the first 3 hours, there will be redness and slight heat emanation from the treated area - this is a normal part of your body's natural healing response. It is unusual to experience severe or excessive pain, as well as any bruising; let us know if this occurs.

#### Activity:

Post-treatment redness is mild, and you may return to regular activities immediately. You may experience mild heat emanating from the treated area. This is a normal part of the body's natural healing response. Do not apply ice or cooling compresses.

#### Moisturizer:

Moisturizer should be applied regularly throughout the course of your treatment series, and it may be applied immediately after each treatment.

#### Make-Up:

Make-up can be applied immediately after each treatment. Do not sleep with makeup on the treated area. It is important to remove all make-up that is applied to the skin at night.

#### Avoiding the Sun:

Avoiding direct sun should become a permanent component of your long-term skin care program. Always use a broad-spectrum sunscreen of SPF 30 or greater, even on cloudy days, regardless of season.

#### Long-Term Skin Care:

In addition to avoiding direct sun exposure, we suggest all clients use long-term skin care that prioritizes the youthful, rejuvenated appearance you have achieved. We offer clients a program for long-term facial skin maintenance. This unique program offers state-of-the-art skin maintaining and rejuvenating creams that are only available and administered by our medical team.

#### Home Regime:

To enhance the results of the treatments, we recommend that you maintain a healthy and active lifestyle. Gaining weight during your treatment series could compromise your end results.

### WARNING SIGNS

The following are some of the symptoms that should alert you to the possibility of an impending or existing complication and you should contact the clinic:

#### **Infection:**

Infection may be present if you notice:

- (i) Increased (rather than decreasing) facial swelling after the first 24 - 36 hours.
- (ii) Redness spreading beyond the area of resurfacing, that is warm and tender to touch.

## VENUS VERSA™ (MP)<sup>2</sup> POST-PROCEDURAL CARE INSTRUCTION BOOKLET - ACKNOWLEDGMENT AND RELEASE

I, \_\_\_\_\_ have had an opportunity to review the Venus Versa™ (MP)<sup>2</sup> Post-Procedural Care Instruction Booklet. I understand the items it contains and have initialed each page. I have been given an opportunity to ask any questions regarding these instructions and have had these questions answered to my satisfaction.

I understand that my cosmetic outcome may be compromised or a complication may ensue by:

1. Failure to attend any scheduled post-procedural visit.
2. Failure to follow post-procedural care instructions.
3. Failures to report symptoms or signs that are unusual or concerning.
