

BOTOX

Post-Care | FAQ | Results

FAQ

Q: How long does it last?

A: Depending on the amount injected, usually results can be seen for 3-6 months.

Q: Will Botox eliminate lines on my face?

A: Botox will definitely diminish the lines but depending on the skin damage botox may only soften the appearance of the lines.

Q: When will results be seen?

A: It can take approximately 4 to 7 days for results to be seen. If the desired result is not seen after 2 weeks of your treatment you may need additional Botox. Please contact your provider after the 2 week window if desired results aren't seen.

Results

Helps Asymmetry of facial features.

Post-Care

To ensure the proper healing environment, be certain to observe the following:

- Do NOT touch/ rub the treated area for 4-6 hours following treatment. Do NOT receive facial/ laser treatments or microdermabrasion after Botox injections for at least 14 days. Ask your provider if you are not sure about the time frame of certain services.
- Light exercise of the treatment area helps the Botox find its way to the muscle to maximize your results.
- Do NOT lie down for 4-6 hours after your Botox treatment.
- Do NOT perform activities involving straining, heavy lifting, or vigorous exercise for 6 hours after treatment. This will keep the Botox in the injected area and not elsewhere.
- DO NOT participate in any activities that would result in over heating or sweating, as heat expands Botox and allows it to travel into other muscles. This can cause complications.
- First time Botox clients may experience fluid retention around the eyes, which will resolve, time frame may vary.
